TECH SKILLS

LANGUAGES

- JavaScript
- C#/.NET

FRONT-END

- React
- HTML
- Tailwind CSS

BACK-END

- PostgreSQL
- Netlify
- Cloudflare
- Node.JS
- Express.JS

MANAGEMENT

- GitHub
- Visual Studio Code, Visual Studio
- Trello
- Adobe Photoshop

PROFILE

Highly motivated Software Developer with a strong passion for building innovative web applications. As someone who can quickly adapt to new technologies, I'm committed to learning and contributing to a dynamic team while staying current with industry trends.

PROFESSIONAL EXPERIENCE

Evolving Portfolio: Ongoing commitment to software innovation reflected in my portfolio

<https://dmytro.codes>

Junior Software Developer

Northcoders / Manchester

Feb 2023-May 2023

Key Achievements

- **Teamed with 5 developers** to create text based mobile app game, using React Native with Expo, TypeScript, Node.js & Express, MongoDB, Passport.js, Mocha & Chai for testing, Android Studio for mobile Emulation.
- **Test-Driven Development:** Implemented in pair programming, ensuring the creation of reliable and maintainable code
- **Collaborative Workflow:** Led efforts to optimize GitHub collaboration, streamlining version control and team productivity, resulting in a more agile and efficient development environment

<https://northcoders.com/projects/may-2023/cosmic-conflict>

Front-end:

- **User experience:** Integrated third-party libraries and APIs, leveraging their functionality to enhance the frontend application's capabilities and provide additional features and data sources
- **User interface:** Translated complex designs into captivating user interfaces, utilizing JavaScript, HTML, and CSS. Designed and implemented reusable and modular UI components in React promoting code reusability and maintainability throughout the project's lifecycle

Front-end project: <https://funnynews.netlify.app/>

Back-end:

- **Database:** Utilized PostgreSQL for efficient data management, paving the way for scalable and structured applications. Designed and maintained relational databases, ensuring data integrity and efficient querying.
- **Servers:** Engineered resilient Node.js and Express.js applications, seamlessly connecting with dynamic ReactJS front-ends.

Back-end project: <https://github.com/safchik/be-nc-news-project>
